

Using QR codes to support your fundraising

QR codes can make it easier for people to quickly find out more information about your fundraiser or to donate without having to search or type out lengthy URLs. It might mean they can donate on the spot without having to remember later.

How to create

Lots of online design tools will make QR creation quick and easy like Adobe or Canva.

Input the URL for your fundraising page and let the program create your image. You can often customise colour and style to suit your need.

Top tips

- Make sure you check your QR code before using.
- Don't make the code too small, it can be harder to scan.
